

Chairman's Chat

May 2005

April saw the second running of the Efficiency Run, which has been renamed the Corinium Run. The organising team have worked very hard since the inaugural event last year, in order to rectify some of the small teething problems that we experienced. This year's event attracted a capacity 70 car entry! Vehicles entered, ranged from the latest family cars, to vehicles from the 1930's. This event displays the friendly but professional style of Cirencester Car Club events. It was very efficiently run and proved very popular with all the entrants, providing a relaxed atmosphere but challenging test of driving skill in order for everyone to produce the best economy from their vehicle on the day.

I would like to pass on my sincere thanks to the organising team for working together to produce an event of such a high standard, in doing they are gaining a national reputation which should help to boost entries in years to come.

– Well done to you all.

In the meantime, the first round of the Summer Series has been held at Kemble Airfield, and attracted a record equalling 23 entries. Although a few entries did not make the competitive element in the afternoon, the majority of the entrants went on to enjoy a good, friendly, relaxed but competitive day. The Summer Series is now firmly established in the Club's Calendar and I predict that we may pass the 30 entries mark at some point during the coming season. This in itself is another testament to the Committee's hard work in turning your club round and making it one of the leading club's in Gloucestershire. – Again well done to you all.

Martin Saunders
Club Chairman
